TECHNICAL DATA SHEETS

Product Name: Pyraclostrobin 98% TC

Product Information:

Chemical Name of Active Ingredient:

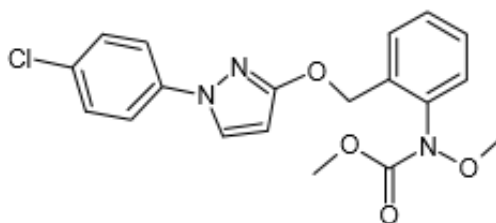

Methyl N-(2-{{[1-(4-chlorophenyl)-1H-pyrazol-3yl]oxymethyl} phenyl) N-methoxy carbamate

CAS NO.: 175013-18-0

Molecular Weight: 387.82g/mol

Molecular Formula: C₁₉H₁₈ClN₃O₄

Structural Formula:

Specifications:

Specifications	Standard
Appearance	Off-white to light yellow powder
Pyraclostrobin Content	≥98.0%
Moisture	≤0.5%
PH	5-8
Insoluble in Acetone	≤0.2%

Usage: Pyraclostrobin is a new broad-spectrum fungicide and a methoxyacrylate fungicide. It is mainly used to prevent various diseases caused by fungi on crops.

Package: in 25kg bag or 25kg drum.

Shipping Information:

Packing Group: III

UN Class: 2811

Hazardous Goods Class: 6.1
